Aerosol Chemistry

Yafang Cheng

Atmospheric Chemistry

Jos Lelieveld
Managing Director

Climate Geochemistry

Gerald H. Haug

Multiphase Chemistry

Ulrich Pöschl

Particle Chemistry

Stephan Borrmann

Independent Research Groups

Central Services

Wildfires, Climate Change and Environmental Impacts

Chaoqun Ma

Kinetics and photochemistry

John Crowley

Optical spectroscopy

Horst Fischer

Radical measurements

Hartwig Harder

Atmospheric modeling

Andrea Pozzer

Organic reactive species

Jonathan Williams

Isotope biogeochemistry

Steve Galer

Organic isotope geochemistry

Alfredo Martinez-Garcia

Micropaleontology

Ralf Schiebel

Inorganic gas isotope geochemistry

Hubert Vonhof

Chemical kinetics and reaction mechanisms

Thomas Berkemeier

Biomolecular analyses and interactions

Janine Fröhlich

Organic pollutants and exposure

Gerhard Lammel

Aerosol analysis and microscopy

Christopher Pöhlker

Multiphase analytics

Frank Drewnick

Nano and micro-particle research

Peter Hoppe

Aerosol and cloud chemistry

Johannes Schneider

Atmospherical hydrometeors

Miklós Szakáll, Karoline Diehl (JGU Mainz)

Physics and chemistry of the UTLS aerosol

Stephan Borrmann, Franziska Köllner

High pressure chemistry and physics

Mikhail Eremets † 2024

Hominin meat consumption

Tina Lüdecke

Satellite remote sensing

T. Wagner

Communications

Susanne Benner

Administration and technical services

Ira Lemm

IT

Thomas Disper

Administration

Ira Lemm

Instrument development and electronics

Frank Helleis

Facility management and operational technology

Carsten Pallien

Researchers support

Karin Sulsky

Workshops

Sebastian Best

Shipping and export control

Martin Carswell
